Attention: Mr. Alcine Grillot

Re: 1970 Landfill License  
South Dayton Dump & Landfill  
1975 Springboro Pike  
Moraine

Dear Mr. Grillot:

Your landfill license expires on December 31, 1969. If you wish to operate a landfill in 1970, the enclosed application forms should be filled out and returned, along with the State required five hundred dollar (\$500.00) license fee to our office as soon as possible. The State law requires you to have your new license by January 1, 1970.

If you desire to continue to operate a dump without a permit and in compliance with Section 3734.01 - 3734.11 of the Ohio Revised Code, the only materials you are permitted to accept are earth or material from construction, mining, or demolition operations and slag and/or other substances which are not harmful or inimical to public health. All accepted material must be compacted and/or buried frequently enough to prevent unsightliness and/or an insect or rodent harborage.

By December 31, 1969 the existing open portions of the landfill must be compacted and covered with at least two feet (2') of earth. In addition, a comprehensive program of rodent elimination must be conducted.

If you have questions concerning this letter or if we may be of further technical assistance, please feel free to call on us.

Sincerely yours,

ROBERT A. VOGEL, M.D.,  
Health Commissioner
